Art Unit: 2834

Claims 1-6, 8, 10-13 and 15-22 are rejected under 35 USC 103 as being unpatentable over Negita (British) in view of Nagai for the specific reasons set forth in paper no. 10(9-14-99).

Regarding applicants comments it is noted that Supervisory Patent Examiner Ramirez does not recall any agreement re future rejoinder of method claims 30-37 beyond any criteria that may be outlined in the MPEP.

Although Negita does not explicitly teach the opening in the ceramic housing being metalized a hermetic adhesive material #15a (fig. 3) is used to join the ceramic housing to the glass closure. A well known means of providing a hermetic seal is to use metal, e.g. solder as the adhesive material. (See e.g. Hata and Hafner of record). Thus as noted in the first office action, providing a metal layer to hermetically seal glass/ceramic, ceramic/ceramic, and glass/glass surfaces is standard practice. Clearly the windows of Nagui are thru holes.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Serial Number: 09/120,806
